

Amendments to the Specification:

At page 8, line 18, please replace the paragraph with the following amended paragraph:

Because the liquid sample may be warmer or colder than the ambient temperature moisture may form on a surface of the window 6, interfering with light along the line of sight.

A1
Accordingly, the window may be treated to be "non-fogging", so that temperature differences in the window do not result in condensation of moisture from the ambient atmosphere. The window 6 can be attached to the handle 4 by any of the means for adhering two layers discussed above.

At page 11, line 25, please replace the subtitle with the following amended subtitle:

A2
III. Improved measurement consistence of from using air gap
